

Markit Sector PMI™ for Asia

Supporting detailed analysis of manufacturing trends across Asia on a monthly basis

Markit Sector PMI data provides corporate planners, economic analysts, policy makers and investors with a unique database for monitoring business cycles by industry.

Asian PMI data is currently available at the macro level for individual economies such as China, Japan, Indonesia and India.

Markit Sector PMI data for Asia includes coverage of 28 detailed industry sectors such as metals, autos and technology. The dataset offers 252 economic indices tracking variables such as output, new orders, employment, exports, prices and stocks, with historic data from September 2007. This dataset can also be used to benchmark sector performance in Asia against comparable data at the global and European levels.

Pan-Asian coverage

5,700 companies operating in China, Japan, India, South Korea, Indonesia, Taiwan, Malaysia, Hong Kong, Singapore and Vietnam.

Breadth of coverage

28 detailed industry sectors across three tiers of detail, covering basic materials, consumer goods and services, financials, healthcare, industrials and technology.

Depth of coverage

252 monthly economic indices for output, new orders, exports, backlogs, purchasing, supplier performance, input prices, output prices and stocks.

Timely

Released two days following the release of global services PMI data.

Comparable

Consistent methodology to ensure comparability with national PMI data for Asia and detailed sector PMI data at the global and European levels.
