

# MarkitSERV for Clearing

Real-time, independent connectivity to multiple clearinghouses for rates, credit, FX and equity OTC derivatives

MarkitSERV provides a single platform for the submission, monitoring and reporting of cleared and non-cleared, STP and non-STP transactions, across multiple asset classes.

The Dodd-Frank Act, EMIR and evolving global regulations aimed at reducing risk and increasing transparency in OTC derivatives trading has led to multiple central counterparties (CCPs) offering clearing support to industry participants. For the buy-side, supporting new clearing workflows means managing multiple distinct affirmation workflows, monitoring unique and changing sets of eligible products and maintaining connectivity to a variety of processing technologies.

MarkitSERV's comprehensive OTC clearing solution links buy-side firms with executing brokers, clearing members and CCPs for efficient, end-to-end trade processing from execution to clearing.

MarkitSERV's is connected to all major clearinghouses supporting OTC derivatives. By submitting trades to MarkitSERV, buy-side participants can greatly reduce the cost and effort required to maintain direct relationships with multiple CCPs. Furthermore, participants are insulated from managing future changes to connectivity, eligible products and associated workflows because we continuously update our API connections to clearinghouses. Our independent, agnostic platform enables buy-side participants to clear all OTC derivative asset classes with multiple clearinghouses and to benefit from Alpha USI generation and cross-jurisdictional regulatory reporting. As such, MarkitSERV ensures that buy-side firms are prepared for global regulatory change.

## Cost efficiency

Clearing connectivity is free to buy-side participants. Efficient access to multiple CCPs and clearing members offer further cost control and limits management requirements.

## Supporting fund administrators

Specific fund administrators services include multi-client reporting tools and consolidated third-party views.

## Risk mitigation

In addition to efficient, real-time access to regulatory clearing and reporting destinations, optional services include real-time notification of "out trades" and screen-based intraday MIS dashboards.

## Broadest reach

MarkitSERV is connected to more than a dozen clearinghouses, providing a single platform for processing trades in multiple OTC asset classes.

**5,000,000+**

trades processed for clearing

SINCE MANDATORY CLEARING  
IN MARCH 2013
