

# **IHS Markit Benchmark Administration Limited (IMBA UK) Consultation on coupon payments following Russia-related Sanctions (2022-08)**

29 March 2022

## **1. IMBA UK's Administration**

IHS Markit Benchmark Administration Limited (IMBA UK) is the Index Administrator of the iBoxx indices. IMBA UK administers the indices in accordance with the International Organisation of Securities Commissions Principles for Financial Benchmarks (IOSCO Principles) and the UK Benchmarks Regulation (UK BMR).

## **2. Consultation Results**

Given recent public information suggesting some certainty around coupon payments being received successfully on specific Russian bonds, IMBA UK has launched a [consultation](#) on 25 March seeking feedback on the treatment of such payments in iBoxx indices.

During the course of the consultation, IMBA UK has received largely supportive feedback to implement the proposed treatment of coupons. In accordance with its governance process, IMBA UK therefore announces the following:

1. Russian Federation debt in hard currency as well as corporate and sub-sovereign debt in hard currency with Russia as the country of risk

IMBA UK will recognize the coupon payments that have been publicly confirmed to be disbursed to investors and include them into the total return calculation of the indices. This will take place as of 30 March 2022 for the confirmed coupons as of today. Any further coupons that are confirmed in the next two days will be implemented as of 31 March 2022. Any coupon payments that are not confirmed to be disbursed by 31 March 2022 will not be considered in the index performance. Coupons that are confirmed after the month-end removal of Russian securities will not be considered in the index calculations.

2. Russian Federation local currency (RUB-denominated) government debt

All coupons due after 11 March (the effective date of the original consultation) and denominated in RUB will be not be considered in the index performance, given such payments are distributed into restricted "type C accounts" held by Russian banks.

As communicated in the result of Consultation on Russia-related Sanctions and Market Accessibility consultation on 10 March 2022, outstanding bonds with Russia as the country of risk will leave the iBoxx indices on 31 March 2022 with a value of zero (technically 0.000001). Any hard currency bonds that are confirmed to be redeemed by 31 March 2022 will be recognized in the index with their final redemption price. For clarity, bonds in iBoxx indices that are designated with country of risk “Belarus” do not have coupon payments due in March 2022 and are thus not featuring in the consultation and list.

See below appendix for impacted securities.
